

# Programming Part 3: Review Package

Answer the following questions to prepare for your test.

## Average Calculator

Create a program that calculates the averages of the marks that user inputs. The user is allowed to input any amounts of marks they want as long it is 0 to 100.

## Printing of Numbers

Create a program that prints out the numbers from 1 to a user entered number, then back down to 1

Place your code here

## Factor Finder #1

Given an integer input greater than 0, print all its factors. If the user input is less than zero, make the user input another integer.

Output N = 12

1  
2  
3  
4  
6  
12
